The radio that came out of your vehicle will not have to be recoded even if you had it out of the vehicle for years it will always work in the vehicle it was coded for you can run your vehicle with out the radio you just will not have door chimes till the radio is reinstalled

LAMPS

Every truck radio we get in for repair has lamps out, to check your lamps turn on your headlight and all your buttons should light up.

There are 10 lamps in the face of the radio if you have any out they all need to be replaced when 1 goes out it starts to put a strain on the other and will weaken them. The radio uses 2 different styles of lamps 7 of the small base and 3 of the large base. We only use factory OEM lamps made for this radio aftermarket lamps will yellow over time and dim.
